Please view the program [here](#) to view your allocated speaking time for the Poster Pitch session.

Your allocated presentation time is **5 minutes** in length and is designed to convey key information quickly and effectively, engaging the audience and encouraging them to learn more by viewing your poster. The 5 minutes are divided into **3 minutes** for your talk and a further 2 minutes for questions and changeover. **It is critical to adhere to this timeframe to ensure the session runs smoothly and on schedule.**

Please assemble in your session room at least 15 minutes before the start of the session. This will allow time for your Chair to liaise with the speakers, and explain the seating set-up and arrangements for questions/discussion following the conclusion of your presentation.

## GENERAL ADVICE FOR YOUR DIGITAL POSTER

- After the title, the two most important panels are the Introduction and the Conclusion. Based on these, a reader will decide whether to consider the poster details and perhaps talk to the presenter. Your poster needs to be very clear, concise and visually attractive.
- Results should be presented graphically if possible. Avoid large tables of data.
- Use pictures, symbols and colour. Figure legends are essential and should be short but informative.
- Use the space to attract your audience for discussion, not to present complex details of methods and results.

**Thank you for your help in making ISVEE17 a success.**
